

## COMPANY PROFILE

Founded on 19 - Nov- 2009, **CS Soft Solutions** is one of the fastest growing Software Development Company based out of Chandigarh Tricity region, India. Having its dominion in Customized application development solutions using Microsoft .Net framework, Open source technologies, popular mobile apps platforms and the Internet marketing services, the company offers end-to-end services to cater to the diverse requirements of different industries.

We focus on developing applications, which facilitate business processes and workflow automation for any organization to become paperless. Our main areas of expertise include Cloud-based software, ERP, CRM, Design and development of corporate and complex information portals, Business Management Solutions and SAAS, IAAS and product engineering.

We also endeavor to offer comprehensive customized application development solutions using .NET framework, Open source, and native/cross-platform mobile technologies for organizations of different scale, size and domain expertise. Our extensive exposure to these technologies and databases gives us an edge while developing tailor-made solutions for our customers. With a paradigm shift of focus from traditional way of website development to the advent of content management system, mobile apps we have mastered some of the promising platforms such as Dot Net Nuke, Sitefinity, Umbraco, Orchard, MS- SharePoint, Joomla, Drupal, Wordpress, Magento, Cake Php, CodeIgniter Native and Hybrid application development.

Our success in the field can be greatly attributed to our adherence to the best industrial practices and processes required to ensure quality deliverables. By leveraging defined processes, we have made it easier to deliver new products and services quickly and efficiently, without 're-inventing the wheel every time'. We could not have kept up the momentum in providing services to our international customers in the last 7 + years without relentless pursuit of excellence by our dedicated team comprising of proficient software engineers, creative design artists, Sharp Quality Assurance analysts and specialized internet marketers. We are offering our services to some of the best in the industries across the globe and they are happy with our quality of work cost effective solutions.
