## eNest - Business Practice

eNest's business focus has been built around four 'Business Practices' called

- IT Services
- IT Enabled Services
- Mobile Application Development
- Testing Practice

### IT Services

All our IT services are focusing on maximizing the value to the customer through systems with long life and fast payback period. eNest offers the following IT services that help you accelerating our client's business performance.

- ASP.NET Development
- Customized Application Development
- Enterprise Application Development
- SAAS Application Development
- Product Re-engineering
- Database Solutions
- System Integration

#### ASP. NET Development:

eNest works within Microsoft's open-source, server-side web application framework to produce dynamic web pages. Projects to date include a foreign language vocabulary building tool, a social networking site geared toward fitness, and an in-house CRM application.

#### Customized Application Development:

In today's business world, unyielding competition requires increasingly complex application solutions. Organizations must exploit emerging opportunities by rapidly adopting new technologies, including web-based solutions.

At eNest, we help define your requirements, write specifications and design, develop, test and integrate software across multiple platforms — including Internet technologies — enabling your systems to function in new operating environments.

We have wide experience in developing customized application to clients across the globe. Our expertise lies in analyzing the complete client requirement and providing most user-friendly solution. We are highly experienced in developing customized application to various industries includes include food and beverage, eCommerce, social networking, real estate, insurance, and more with high security and robust architecture.

Our expertise creates a well-designed database should provide the end product that is tailored to meet both your professional and practical business needs and therefore serve its intended purpose

#### Enterprise Application Development:

eNest has built custom applications for a variety of businesses including a law agency which requested the ability to manage their case details and staff task and assignment.

### SAAS Application Development:

eNest can build your SAAS for your subscription and centrally-hosted solution. Our most recent SAAS project is a GPS tracking application to provide companies with real-time location information of their field staff.

### Product Re-engineering:

Reengineering services are required to tune applications so that IT systems still support the changing business needs. It ranges from preserving the functionality of the product by just migrating it to other platform to achieve higher performance to adding more functionality to the solution.

eNest has wide experience in executing reengineering services. We follow a structural process covering the entire life cycle of the application where the performance of the application is consistently monitored for any gaps. Our strong planning and execution approach reduces the risk factor to the minimum apart from rapidly and effectively working on the architecture your application.

### Our services includes, but not limited to:

- Re-building of legacy applications using different sets of technologies.
- Migration across operating systems, a application servers, languages and databases.
- Web-enabling of client-server application, desktop application and legacy applications.
- Reengineering and enhancements of applications to re-align existing systems with business processes and requirements.

### Our product re-engineering flow

- Analysis/ Customer Study
- Code Walkthrough
- Implementation / Verification
- Final Testing
- Hand Off

### Database Solutions:

Whether it's a new database, consolidation, or update of an existing database system, eNest can improve your data management with our database solutions.

### System Integration:

eNest works with companies to bring together component subsystems and ensure they all function together seamlessly.

### IT Enabled Services

Hosting & Production Support: eNest will work with you on hosting and production. From inception to

support, we have assisted countless businesses across a number of industries. Within this service, we will provide:

- Hosting services, which include website, email, and database
- A step-by-step production

process for your website

- Full design services
- SEO optimization

## Our Client's Accolades

"Mandeep and eNest were truly a pleasure to work with. They took over an existing project and diligently worked to expand and extend the original functionality. Their attention to detail, especially with .NET and Azure, and work ethic were impressive. I would definitely use them again!" -

- **Jeff Cohen**, MindMe Mobile, United States

"He flew from India to Washington, DC, USA, to meet me in October 2015. After much discussion, I decided that he was the right freelancer for the job. He exceeded my great expectations."

- **Prince Ojong**, Overreacher Empire, United States

"It was great working with eNest team. Very professional, great communication, timely delivery and specially would like to thanks testing team as well. Will not stop here and I am going for now long term maintenance services with eNest."

- **Jihad Rawas**, Warda, Saudi Arabia

"eNest and their team, specifically Kunal Chawla and Gurmeet Singh, were a pleasure to work with. Kunal and Gurmeet collaborated together to accomplish our deliverables in a timely and quality manner."

- **Scott Parker**, Director at IR4C Inc., United States

"Once again the management at eNest have provided an excellent solution for the needs of our development. Abhi met all our expectations and has shown a very high level of skill and understanding of the job required and provided sound coding solutions and quality UI that has complimented the complete project. Thank you Abhi, Jagdeep and the whole team at eNest, it has been a pleasure working with you!"

- **Darin Seagrove**, Queensland, Australia

"Tarun was simply amazing to work with. I'd give him my requirements and he built it. Really good at understanding what I wanted and doing it. Mine was pretty complicated job and they made it easy. Highly recommend Tarun and eNest."

- **Chris Durbridge**, AxBess, Australia

"Manjinder helped me create a site in no time! My sense of urgency was really high and he turned around all the files that I needed within hours of me hiring him. His quality of work is high and his work ethic is above and beyond anyone that I have come across! I will definitely continue working with him and the eNest team for future projects! Thank you!"

- **Armen Kenareki**, Vintagon, United States

"I gave Tarun a task that required him to dig into a library and technology he had not worked with before. He was a hard worker and was very diligent. He also provided good suggestions and links to alternatives. I always knew the status of the progress thanks to ODesk, and his regular communications with me. I will certainly use eNest in the future as the need arises."

- **Aaron Cutlip**, OptiDocs Software LLC, United States

"Good work done by Naresh, well in time, good communications. We will ask him for future data entry tasks and continue cooperation with the eNest Team."

- **Edwin Van IJzendoorn**, EhrmVision, Netherlands

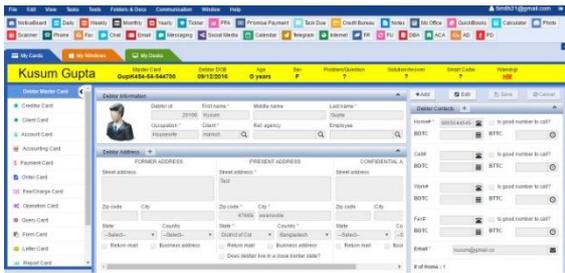

"Amritpal is an excellent developer with outstanding knowledge of numerous technologies. He's very reliable, hardworking, and dedicated to his work. We look forward to working with him again in the near future. Great job Amritpal!"

- **Justin Chambers**, UWA, Houston, United States
