Respected Sir,

First of all I would like to express my gratitude to placement cell giving me this opportunity to work at TT CONSULTANTS. I joined the company on 4 January,2016 and underwent my 6 months training result of which I was retained as an employee on 1 July,2016. It is a research oriented company dealing in patents and related searches. As a mechanical engineer, this intellectual property field was quite new for me but once I got familiarised I am not regretting my decision of working here. As per company requirements, they are looking for candidates with high technical knowledge in their field and good communication skills. I would like to suggest my juniors to at least make a strong base in one or two core subjects like automobile( my personal favourite). Apart from work culture, the company's environment is highly entertaining. We have fun Friday every week and party night every quarter. So It would be better for placement cell to make good relation with the company for future recruitments. Moreover,the company has large of openings for electronics and communications compared to other fields due to high advancement and patent filings in this field.

Thanking You

Vivek

Dear TTC Selects,

Guess most of you have joined TT Consultants - please share your joining status.

Also, share your feedback/experience at TTC Mohali - any feedback/advise for your juniors will be appreciated.

Best Wishes,

Dr Dham  
Placement Cell PUP
