Faculty of Life Sciences

Outline of Course and Syllabi

for

M.Sc. Zoology

(Choice Based Credit System)

SESSION : 2020-21

M.Sc. II (Final)
SEMESTER-III 2020-2021

Theory Classes	: 18 Hours per week
Practical Classes	: 09 Hours per week
Seminars/Library Consultation	: 06 Hours per week

THEORY PAPERS	Theory	Internal Assessment
MZ311 Animal behaviour	: 44 Marks	:16 Marks
MZ312 General Endocrinology	: 44 Marks	:16 Marks
MZ313 Fish and Fisheries	: 44 Marks	:16 Marks
MZ314 Research Methodology	: 44 Marks	:16 Marks
Specialization Paper-I (Respective specialization) (MZE315, MZC317, MZP 319 & MZPR321)	: 44 Marks	:16 Marks
Specialization Paper-II (Respective specialization) (MZE316, MZC318, MZP320 & MZPR322)	: 44 Marks	:16 Marks
Total : 264 Mark		:96 Marks
Total : 264+96=360		

Open Elective Subject – Economic Zoology: Qualifying (50 marks)

PRACTICAL PAPERS

MZ323 Practical paper-V (Pertaining to theory papers MZ311, MZ312, MZ313 & MZ314)	: 80 Marks
MZ324 Practical paper-VI (Pertaining to theory papers of specialization I & II)	: 60 Marks
Total : 140 Marks	

INTERNAL ASSESSMENT

i	Attendance	20%	% of the Total Marks of the Internal Assessment
ii	Assignment/Project/Seminar	40%	
Iii	Two Mid-semester Tests/Internal Examinations	40%	

Attendance	– 20 Marks
Assignment/Project/Seminar	– 38 Marks
MST	– 38 Marks

Total : 96 Marks

The consolidated marks, out of maximum 96 marks, shall be supplied to the University through the Head of the Department under internal Assessment.

TOTAL MARKS FOR SEMESTER – III

Theory papers : 264 Marks
 Practical Papers : 140 Marks
 Internal Assessment : 96 Marks

Total : 500 Marks

Course Code	Course	Course option	Credits	Total Marks (Ext+Int)
MZ311	Animal behaviour	Core-XII	3	44+16=60
MZ312	General Endocrinology	Core-XIII	3	44+16=60
MZ313	Fish and Fisheries	Core-XIV	3	44+16=60
MZ314	Research Methodology	Core-XV	3	44+16=60
MZE315, MZC317, MZP 319 & MZPR321	Specialization Paper-I	Core-XVI	3	44+16=60
MZE316, MZC318, MZP320 & MZPR322	Specialization Paper-II	Core-XVII	3	44+16=60
MZ323	Practical – V Pertaining to theory paper MZ311, MZ312, MZ313 & MZ314	Practical–V	4½	80
MZ324	Practical – VI Pertaining to theory paper of specialization-II and specialization paper-III	Practical–VI		60
	Seminars/Library Consultation <i>Marks already included in Internal assessment</i>		3	
		Total	25½	500

SEMESTER-IV 2020-21

Theory Classes : 18 Hours per week
 Practical Classes : 09 Hours per week
 Seminars/Library Consultation : 06 Hours per week

THEORY PAPERS

	Theory	Internal Assessment
MZ411 Integrative Organismal Biology	: 44 Marks	:16 Marks
MZ412 Wild life & its management	: 44 Marks	:16 Marks
MZ413 Zoogeography and Evolution	: 44 Marks	:16 Marks
MZ414 Limnology (Elective Paper-II)	: 44 Marks	:16 Marks
MZ415 Biotechnology and Env. (Elective Paper-II)	: 44 Marks	:16 Marks
Specialization Paper-III (Respective Specialization)	: 44 Marks	:16 Marks
(MZE416, MZC418, 9; MZP 420 & MZPR422)		
Specialization Paper-IV (Respective Specialization)	: 44 Marks	:16 Marks
(MZE417, MZC419, MZP421 & MZPR423)		
	Total : 264 Marks	:96 Marks
	Total : 264+96=360	

Open Elective (Optional) Subject – Economic Zoology : 50 Marks

PRACTICAL PAPERS

MZ424 Practical paper-VII (Pertaining to theory papers MZ411, MZ412, MZ413, MZ414, MZ415)	: 80 Marks
MZ425 Practical paper-VIII (Pertaining to theory papers of specialization VI & VII)	: 60 Marks!
Total	: 140 Marks

INTERNAL ASSESSMENT

i	Attendance	20%	% of the Total Marks of the Internal Assessment
ii	Assignment/Project/Seminar	40%	
iii	Two Mid-semester Tests/Internal Examinations	40%	

Attendance	– 20 Marks	
Assignment/Project/Seminar	– 38 Marks	
MST	– 38 Marks	Total: 96 Marks

The consolidated marks, out of maximum 96 marks, shall be supplied to the University through the Head of the Department under internal Assessment.

TOTAL MARKS FOR SEMESTER – IV

Theory papers	: 264 Marks
Practical Papers	: 140 Marks
Internal Assessment	: 96 Marks
	Total:500 Marks

Course Code	Course	Course option	Credits	Total Marks (Ext+Int)
MZ411	Integrative Organismal Biology	Core-XVIII	3	44+16=60
MZ412	Wild life & its management	Core-XIX	3	44+16=60
MZ413	Zoogeography and Evolution	Core-XX	3	44+16=60
MZ414	Limnology	Elective Paper-II	3	44+16=60
MZ415	Biotechnology and Environment	Elective Paper-II	3	44+16=60
*MOOC courses				
MZE416, MZC418, 9; MZP 420 & MZPR422	Specialization Paper-III	Core-XXI	3	44+16=60
MZE417, MZC419, MZP421 & MZPR423	Specialization Paper-IV	Core-XXII	3	44+16=60
MZ424	Practical – VII Pertaining to theory paper MZ411, MZ412, MZ413, MZ414/ MZ415	Practical – VII	4½	80
MZ425	Practical – VIII Pertaining to theory paper of specialization -III and specialization - IV	Practical – VIII		60
	Seminars/Library Consultation <i>Marks already included in Internal assessment</i>		3	
		Total	25½	500

- * The subjects which the students can opt from MOOC will be notified by the department semester wise time to time
- * In addition to the above mentioned subjects there will be an Open Elective as a Optional Subject. The list of open elective subjects will be notified by the department from time to time.

Semester – III
MZ311
Animal Behaviour

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Animal Psychology- Classification of behavioural patterns
 - 1.1 Analysis of Behaviour (ethogram)
 - 1.2 Innate Behaviour
2. Behavioral Genetics:
 - 2.1 Genes and behavior
 - 2.2 Evaluation of behavior
 - 2.3 Co evolution
3. Control of behaviour:
 - 3.1 Neural
 - 3.2 Hormonal
4. Communication :
 - 4.1 Chemical
 - 4.2 Visual
 - 4.3 Audio
 - 4.4 Evolution of language (primates)

SECTION-B

5. Social Behaviour:
 - 5.1 Aggregation
 - 5.2 Schooling in fishes
 - 5.3 Flocking in birds
 - 5.4 Group selection, kin selection, altruism
 - 5.5 Social organization in insects and primates.
6. Reproductive Behaviour:
 - 6.1 Mating systems

- 6.2 Courtship
- 6.3 Sperm competition
- 6.4 Parental Care

- 7 Biological Rhythms:
 - 7.1 Circadian and circannual rhythms
 - 7.2 Orientation and navigation
 - 7.3 Migration of fishes & birds
- 8 Learning and memory
 - 8.1 Insight learning
 - 8.2 Association learning
 - 8.3 Reasoning
 - 8.4 Cognitive skills

SUGGESTED READINGS

1. Alcock, J. Animal behavior: An evolutionary approach, Sinauer Assoc., Sunderland, Mass. USA.
2. Bradbury, J.W., and S.L. Verhrencamp. Principles of Animal Communication, Sinauer Assoc., Sunderland, Mass. USA.
3. Clutton-Brock, T.H. The evolution of Parental care, Princeton Univ. Press, Princeton, NJ, USA.
4. Eibl-Eibesfeldt, I. Ethology. The biology of behaviour, Holt, Rinechart & Winston, New York.
5. Gould, J.L. The mechanisms and evolution of behaviour.
6. Hauser, M. The evolution of communication, MIT Press, Cambridge, Mass. USA.
7. Hinde, R.A. Animal behaviour: A synthesis of Ethology and comparative psychology. McGraw-Hill, New York.
8. Krebs, J.R. and N.B. Davies, Behavioural ecology, Blackwell, Oxford, U.K.
9. Wilson, E.O. Sociobiology: The new synthesis, Harvard Univ. Press, Cambridge, Mass. USA.

Semester – III
MZ312

GENERAL ENDOCRINOLOGY

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Hormones and hormone Action:
 - 1.1 Classification of hormones
 - 1.2 Storage and secretions of hormones
 - 1.3 Mechanism of hormone action:
 - 1.3.1 Membrane bound receptors
 - 1.3.2 Intracellular receptors
 - 1.3.3 Second messengers in hormone action : cAMP, cGMP, calcium ions, phosphoinositides and protein kinase cascade
 - 1.3.4 Control of hormone secretion
 - 1.3.5 Measurement of hormones in blood
2. Hypothalamus and pituitary gland:
 - 2.1 The pituitary gland and its relation to the hypothalamus
 - 2.2 Control of pituitary secretion by hypothalamus
 - 2.3 Physiological functions and regulation of growth hormone
 - 2.4 Abnormalities of growth hormone secretion
 - 2.5 Neurohypophyseal hormones:
 - 2.5.1 Chemical nature and physiological functions of antidiuretic hormone (Vasopressin) and oxytocin.

SECTION- B

3. Thyroid hormones:
 - 3.1 Biosynthesis and secretion of thyroid hormones.
 - 3.2 Physiological functions of thyroid hormones
 - 3.3 Regulation of thyroid hormones

- 3.4 Antithyroid substances
- 3.5 Abnormalities of thyroid hormones
- 4. Parathyroid hormones:
 - 4.1 Physiological anatomy of parathyroid glands
 - 4.2 Effect of parathyroid hormone on calcium and phosphate metabolism
 - 4.3 Regulation of parathyroid secretions
- 5. Calcitonin and its control on calcium ion concentration.
- 6. Adrenocortical hormones:
 - 6.1 Functions of the glucocorticoids on metabolism
 - 6.2 Regulation of cortisol secretion
- 7. Catecholamines:
 - 7.1 Biosynthesis and metabolism of epinephrine and norepinephrine.
 - 7.2 Physiological effects of catecholamines
- 8. Pancreas and its hormones:
 - 8.1 Insulin and its metabolic effects
 - 8.2 Glucagon and its effect on glucose metabolism.

SUGGESTED READINGS

1. E.J.W. Barrington: General and comparative Endocrinology, oxford, clarendon press.
2. Guyton, AG and Hall J.E: Text book of Medical Physiology 11th Ed, Saunders publications. 2006.
3. William F. Ganong: Review of medical physiology, international 21st edition M C Graw Hill companies. 2003.
4. P.J. Bentley: Comparative vertebrate Endocrinology, Cambridge University Press, 1976.
5. R.H. Williams: Text Book of Endocrinology, W, B. Saunders.
6. A. Guber manetal: Comparative Endocrinology, John Wiley and sons.
7. Francis. S. Greenspan & David G. Gardner: Basic and clinical endocrinology, 7th edition MC graw Hill Co. 2003.
8. Norman Lavin: Manual of Endocrinology and Metabolism, Linncott Williams and Williams.

Semester – III
MZ313
FISH AND FISHERIES

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

Section A

1. Outline classification of fish
2. Teleostei with special reference to following orders:
 - 2.1 Ceratodontiformes
 - 2.2 Lepidosueniformes
 - 2.3 Acipensiformes
 - 2.4 Amiiformes
 - 2.5 Semionotiformes
 - 2.6 Clupeiformes
 - 2.7 Cyprinodontiformes
 - 2.8 Perciformes
 - 2.9 Anguilliformes
 - 2.10 Beloniformes
 - 2.11 Gasterosteiformes
 - 2.12 Gadiformes
 - 2.13 Pleuronectiformes
 - 2.14 Tetradontiformes
 - 2.15 Echeiniformes
 - 2.16 Ophiocephaliformes
3. Scales : types, structure and functions
4. Coloration : chromatophores, pigments and biological significance of coloration in fish
5. Bioluminescence in fish and its significance
6. Electric organs, their structure and use in fish

Section B

7. Respiratory organs
8. Structure, modification and function of gills
9. Air breathing accessory organs
10. Swim bladder
11. Lateral line organs
12. Ultimobranchial glands
13. Corpuscles of stannuis
14. Biochemical composition and preservation of fish
 - 14.1 Biochemical composition of fish
 - 14.2 Nutritional value of fish
 - 14.3 Poisoning toxicity and allergies from fish as food
 - 14.4 Fish preservation

Semester – III
MZ314

RESEARCH METHODOLOGY

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Principles and applications:

1.1 Phase contrast microscope

1.2 Fluorescence microscopy

1.3 Scanning electron microscopy (SEM) and transmission electron microscopy (TEM)

2. Principles and applications:

2.1 Thin layer chromatography

2.2 Gas chromatography (GLC)

2.3 High pressure liquid chromatography (HPLC)

2.4 Ion exchange and affinity chromatography

3. Principles of biophysical methods for structural analysis of biopolymers:

3.1 UV, fluorescence and circular dichroism (CD) spectroscopy

3.2 NMR, ESR and atomic absorption spectroscopy.

SECTION-B

4. Principles and applications of tracer techniques:

4.1 Radio active isotopes and half life of isotopes

4.2 Autoradiography

4.3 Liquid scintillation spectrometry.

5. Methods techniques.

5.1 Polymerase chain reaction, Southern, Northern and Western blotting.

5.2 Principle of electrophoresis, polyacrylamide gel electrophoresis and SDS-PAGE, agarose gel electrophoresis.

6. Practice of statistical methods in biological research:

6.1 Basic statistics-average, statistics of dispersion co-efficient of variations

6.2 Probability distribution- binominal, poisson and normal

6.3 Tests of statistical significance –simple correlation of regression and analysis of variance.

Semester – III
MZE315

INSECT MORPHOLOGY & CLASSIFICATION

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Morphology of facial sutures
2. Morphology of facial region
3. The types of antennae in Insects
4. Morphology of generalized & specialized mouth parts.
5. The neck region in Insects
6. Topography of typical tergum, sternum and pleuron
7. Generalized structure of wing and wing modifications
8. Generalized structure of Insect leg and leg modifications.

SECTION-B

9. Pregenital, genital and post genital appendages
10. Insect abdomen generalized structure
11. Generalized structure of external female genitalia
12. Generalized structure of external male genitalia.
13. Origin and evolution of Insects
14. General introduction to insect orders
15. Classification of major Insect orders up to families of economic importance.

Semester – III
MZE316

INSECT ANATOMY AND PHYSIOLOGY

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Integument:
Structure
Synthesis of chitin
2. Metamorphosis:
Types
Hormonal control.
3. Digestive system:
Anatomy of digestive system in various insects
Physiology of digestion.
4. Excretory system:
Structure of excretory organs
Physiology of excretion
5. Circulatory system
Anatomy and physiology.

SECTION-B

6. Respiratory system:
Structure and physiology.
7. Reproductive system:
Male reproductive system
Female reproductive system.
8. Nervous System
9. Sense Organs – Visual, auditory and tactile
10. Endocrine glands.

Semester – III
MZC317

GENOME AND GENOMICS

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Prokaryotic genome
Chemical composition of genome
Organisation of genome into nucleoid
2. Extra chromosomal DNA
Bacterial plasmids and episomes
Transposable genetic element of bacteria.
3. Organisation of eukaryotic genome:
C-Value paradox
Reassociation kinetics
Sequence complexity
4. Packaging of eukaryotic genome into chromosomes:
Chemical nature of eukaryotic chromatin
Packaging into nucleosome, solenoid and supersolenoid.

SECTION-B

5. Organisation of viral genomes:
Genetic analysis of bacterial viruses.
Genetic analysis of retrovirus.
6. Genomes sequestered in organelles:
Mitochondrial genome
Chloroplast genome
Recombination and rearrangement of organelle DNA

7. Molecular analysis of genomes:
Techniques : chromosome walking, DNA sequencing, PCR
Simple sequence repeats (SSR's) Variable number of tandem repeats (VNTR's)
Molecular markers and their applications.

8. Genomics and proteomics:
Introduction to genomics and proteomics
Functional genomics
Pharmacogenomics.

Semester – III
MZC318

Membrane and the Cytoplasm: Structure and Function.

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Membrane structure:
 - The lipid bilayer
 - Membrane proteins
 - Human erythrocyte membrane
2. Membrane transport:
 - Diffusion and facilitated diffusion
 - Na⁺ K⁺ transport system, calcium and proton pumps
 - Co-transport by symporter and antiporters
3. Membrane potentials:
 - Ultrastructure of neuron
 - Conduction of nerve impulse
 - Synaptic transmission
4. Cell signaling:
 - 4.1 Cell surface receptors
 - 4.2 Second messenger systems
 - 4.3 Neurotransmitters

SECTION-B

5. Cytoskeleton:
 - Microtubules
 - Intermediate filaments
 - Microfilaments

6. Cell adhesion and communication:
 - Tight and gap junction
 - Connexins and desmosomes
 - Adhesive proteins
7. Lysosomes:
 - Enzymes of lysosomes
 - Heterophagy
 - Autophagy.
8. Intracellular protein trafficking:
 - Protein synthesis on free and bound ribosomes
 - Targeting of proteins to ER
 - Membrane protein segregation and Golgi sorting

SUGGESTED READINGS

Semester – III
MZP319

REPRODUCTIVE PHYSIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION –A

1. Sexual Reproduction:
 - 1.1 Sexual determination,
 - 1.2 Development of accessory sex organs and external genitalia,
 - 1.3 Disorders of embryonic sexual development
2. Endocrine Regulation of Reproduction
3. Histology of the adult mammalian testis:
 - 3.1 Structure and function of the Leydig cells
 - 3.2 Endocrine function of the sertoli cells
4. Spermatogenesis and its hormonal control and abnormal spermatogenesis and male fertility.
5. Function of the male accessory reproductive organs-epididymis, seminal vesicles, prostate gland
6. Structure of spermatozoa
7. Biochemistry of semen
8. Capacitation of spermatozoa.

SECTION – B

9. Structure of adult mammalian ovary
10. Folliculogenesis and ovogenesis
11. Hormonal factors in ovulation
12. Abnormalities of ovarian function
13. Corpus luteum and its function
14. Reproductive cycles and their hormonal regulation

15. Functions of placenta
16. Regulation of parturition
17. Structure, development, differentiation, and hormonal regulation of mammary glands
18. Factors regulating the initiation and maintenance of lactation.

SUGGESTED READINGS

1. Austin, C.R. and Short, R.V. (1984): Hormonal control of Reproduction, Cambridge University Press. Cambridge. UK.
2. Finn, C.A. (1982): Oxford Reviews of Reproductive Biology, Vol. 4., Clarendon Press, Oxford.

7. Ganong, W.F., 2005, Review of Medical Physiology. 22nd edition, McGraw Hill Publications, New York.

Semester – III
MZP320
ENVIRONMENTAL PHYSIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION A

1. Basic concepts of environmental stress
2. Thermal stress:
 - 2.1 Rate effects
 - 2.2 Acclimation and acclimatization
 - 2.3 Endothermy in invertebrates
 - 2.4 Nature of chilling and freezing injuries, mechanisms of cold tolerance and resistance
 - 2.5 Molecular mechanisms of thermal acclimation in poikilotherms- homeokinetic and homeoviscous adaptations
3. Water, osmotic and ionic stress:
 - 3.1 Preservation of intracellular solvent capacity and associated metabolic adaptations
 - 3.2 Ionic regulation in Micro-organisms
 - 3.3 Regulation of intracellular osmolarity; role of glutamate dehydrogenase; coupling of water transport to active transport of solutes
 - 3.4 Sodium pump and Na, +K, + AT Pase in relation to salinity adaptation: in freshwater and sea water fishes
 - 3.5 Ion transport in avian salt gland and its neuroendocrine regulation.

SECTION – B

4. Pressure stress:
 - 4.1 Rate effects
 - 4.2 Enzymatic adaptations to hyperbaric stress with special reference to deep sea fish
 - 4.3 Adaptations to depth problems; concept of buoyancy in marine organisms
 - 4.4 Physiology of aviation and space:
 - 4.4.1 Effects of centrifugal and linear acceleratory force on the body

4.4.2 Weight lessness in space

5. Oxygen deficient stress:

5.1 Oxygen debt in vertebrate muscle and its anoxia adaptations

5.2 Anoxia adaptation in anaerobic vertebrates

5.3 Biochemical adaptations to high altitude in man

5.4 Respiratory Adaptations in parasitic habitats

5.5 Hypoxic & hyperoxic adaptations in organisms inhabiting shore lines and estuaries

SUGGESTED READINGS

Semester – III
MZPR321
VECTOR BIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Arthropods as vectors:
 - Classification of arthropod vectors
 - Modifications in the mouth parts of insect vectors
 - Ticks and their role in disease transmission
2. Mites as vectors:
3. Important vectors from the following orders.
 - Hemiptera
 - Anoplura
 - Siphonoptera

SECTION – B

4. Life histories of vectors belonging to following families and their disease relationships
 - Psychodidae
 - Simulidae
 - Glossinidae
 - Tabanidae
5. Myiasis
6. Life histories of mosquitoes and their role in transmission of following diseases.
 - 6.1 Malaria
 - 6.2 Filariasis
 - 6.3 Yellow fever
 - 6.4 Dengue
 - 6.5 Encephalites.

SUGGESTED READINGS

Semester – III
MZPR322
HUMAN-PARASITOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Protozoa:

General organization and outline classification of parasitic protozoa

Epidemiology, morphology, life cycle, pathogenicity, and control of *Entamoeba histolytica*, *Balantidium coli*, *Giardia lamblia*, *Trichomonas*, *Leishmania*, *Trypanosoma*, *Plasmodium*, *Toxoplasma* and *Cryptosporidium*.

2. Trematoda:

General organization and outline classification of digenetic trematodes, variation in Life cycle in Digenea, Ultrastructure of body wall of digenetic trematodes

Epidemiology, morphology, life cycle, pathogenicity, and control of *Fasciola hepatica*, *Fasciola buski* and *Paragonimus westermani* and *Schistosomes*.

SECTION –B

3. Cestoda:

General Organisation and outline classification of cestoda, various larval forms and ultrastructure of the body wall of cestodes

Epidemiology, morphology, Life cycle, pathogenecity and control of *Diphyllobothrium latum*, *Taenia solium*, *T. saginata*, *Echinococcus granulosus*, *Hymenolepis diminuta*, *H.nana*, *Dipylidium caninum* including sparganosis, cysticercosis and hydatid disease.

4. Nematoda:

General organization, classification and life cycle patterns

Epidemiology, morphology, life cycle, pathogenicity and control of *Trichuris trichiura*, *Trichinella spiralis*, *Ascaris lumbricoides*, *Enterobius vermicularis*, *Ancylostoma duodenale*, *Necator americanus*, *Strongyloides stercoralis*, *Wuchereria bancrofti*, *Onchocerca volvulus* and *Dracunculus medinensis*.

SUGGESTED READINGS

1. Burton J. Bogitsh and Thomas C. Cheng: Human Parasitology Academic Press.
2. Belding D.L., Text Book of Parasitology III edition, Appleton Centruy Cnoff, New York.
3. Richard R. Kudo: Protozoology, Cheack Thomes Publication.

6. Marquardt, W.C. Demaree, R.S. and Gruieve, B. 2000, Parasitology and Vector Biology, Harcourt A.P.

MZ323

Semester III

Practical Paper V: Pertaining to theory papers MZ311, MZ312, MZ313 & MZ314

MZ311

1. To study the behavior of rat by using the "Skinner's Boxes"
2. Habituation/Sensitization in mosquito larvae.
3. To study the Grooming behavior of Cockroach.
4. To study the predation behavior of Rats.
5. Simulating the dilution, confusion and odd prey effects.
6. To study the rolling behavior of pill bugs.
7. To assess the importance of a visual stimulus (background colour/brightness) on an individual's decision to position itself relative to it.
8. To assess the importance of an olfactory stimulus (background food/odorant) on an individual's decision to position itself relative to it.

MZ312

1. To prepare permanent slides of some endocrine glands by microtomy: Thyroid, Pancreas, Thymus, Spleen, Adrenal gland, Testis & Ovary.
2. To study the Process of spermatogenesis, process of oogenesis, Corpus luteum, Structure of sperm, Parathyroid gland, Sickle cell anemia, Mammary gland & Calcified and decalcified bone.
3. To demonstrate the abnormalities of growth hormone: Dwarfism, Gigantism and Acromegaly etc.
4. To demonstrate the abnormalities related to Thyroid Gland: Hyperthyroidism Exophthalmos, Goiter and Grave's disease; Hypothyroidism Myxedema, Cretinism.
5. To demonstrate the abnormalities of Adrenal Gland: Cushing Syndrome.

MZ313

1. To identify, classify and study morphological characteristics of Chondrichthyes fishes.
2. To identify, classify and study morphological characteristics of Osteichthyes fishes
3. To prepare permanent slides of Placoid scales.
4. To prepare permanent slides of Ctenoid scales.
5. To prepare permanent slides of Cycloid scales.
6. To prepare permanent slides of Ganoid scales.
7. To prepare permanent slides of ampulla of lorenzini.

MZ314

1. To study the principle, working and applications of Compound microscope.
2. To study the principle, working and applications of Stereo zoom microscope.
3. To study the principle, working and applications of Phase contrast microscope.
4. To study the principle, working and applications of Fluorescent microscope.
5. To study the principle, working and applications of Spectrophotometer.
6. To prepare the chromatograph for different inks/oils by paper chromatography.

MZ324

Specialization Entomology

Practical Paper VI: Pertaining to theory papers Specialization MZE315 & MZE316

MZE315

1. Morphology of head region (Sutures, Structure, Tentorium etc.)
2. Morphology of thorax
3. Wing and its modifications
4. Morphology of abdomen & genitalic structures
5. To study digestive system of Ak grasshopper.

MZE316

1. To study Nervous system of Ak grass hopper.
2. To study internal reproductive system of an insect.
3. To study excretory system of different insects.
4. To study respiratory system of different insects.
5. To study circulatory system of different insects.
6. To prepare assignment s on
 - a. Nerve conduction in insects.
 - b. Muscle contraction

Specialization Cytogenetics

Practical Paper VI: Pertaining to theory papers Specialization MZC317 & MZC318

MZC317

1. To prepare karyotype of grasshopper chromosomes.
2. To prepare the karyotype of bug chromosomes.
3. Comparative study of sex determining mechanisms in insect chromosome.
4. To perform C banding and study distribution of Cheterochromatin in acrocentric chromosomes.
5. To perform C banding and study distribution of Cheterochromatin in holocentric chromosomes.
6. To perform silver nitrate staining and study the NOR regions in the acrocentric chromosomes.
7. To perform silver nitrate staining and study the NOR region in holocentric chromosomes.
8. Study of sequence specificity (AT and GC) of heterochromatin under the fluorescent microscope.

MZC318

1. To make the chromosome preparations from the bone marrow of Rat and study the chromosome complement from somatic metaphase plates.
2. To make the chromosome preparations from the bone marrow of *Hemidactylus* and study the chromosome complement from somatic metaphase plates.
3. To make the chromosome preparations from testes of Rat and study the different stages of meiosis.
4. To study the somatic metaphase chromosomes from permanent slides of Rabbit.
5. To study the chromosome complement in different stages of meiosis from permanent slides of Varanus.

Specialization Physiology

Practical Paper VI: Pertaining to theory papers Specialization MZP319 & MZP320

MZP319

1. To estimate CO₂ production in human body.
2. To determine the effect of impurities on ice.
3. To determine gustatory receptors.
4. To determine acuity of taste sensation.
5. To determine the zone of tolerance and zone of resistance for mosquito larva.
6. To study the effects of temperature on respiratory rate of a fish.
7. To study the role of glycerine in bringing down freezing point of water.
8. To observe the selective permeability of plasma membrane.

MZP320

1. Anatomy of male reproductive system of rat.
2. Anatomy of female reproductive system of rat.
3. Histology of male reproductive system of rat using microtomy: Testis, Epididymis, Ductus deferens and accessory reproductive glands of male rat; Seminal vesicles, Prostate gland, Cowper's gland
4. Histology of female reproductive system of rat: Ovary, Oogenesis, Structure of Ovum and Corpus luteum
5. Study of Permanent slides: Spermatogenesis, Mammary gland and Placenta.

Specialization Parasitology

Practical Paper VI: Pertaining to theory Specialization MZPR321 & MZPR322 MZPR321

1. Permanent preparation of GI protozoan parasites of the given animal.
2. Collection, fixation and temporary mounting of GI nematode parasites of the given animal.
3. Collection, fixation and permanent mounting of GI cestode parasites of sheep and goat.
4. Dissect and study the detailed morphology of eggs, male and female of *Ascaris suum*.
5. Detailed study of morphology of eggs, male and female of *Trichuris globulosa*.
6. Make a stained preparation of *Fasciola* sp. and study the detailed morphology.
7. Make a stained preparation of *Moniezia* sp. and study the detailed morphology.
8. Examination of freshwater snails for the presence of larval forms of *Fasciola hepatica* and make permanent preparation.
9. Study of permanent slides – *Plasmodium berghei*, *Leishmania* sp., *Balantidium coli*, *Nyctotherus* sp., *Opalina*, *Entamoeba histolytica* – Trophozoite, *Taenia* Scolex, proglottids, cysticercus, hexacanth, Hydatid cyst, *Dipylidium scolex*, *Paramphistomum*, *Fasciola* – egg, radia, cercaria, *Taenia* T. S., *Fasciola* – T.S., *Ascaris* T. S., *Ancylostoma duodenale* male & female, *Enterobius vermicularis* – Male & female, *Dracunculus medinensis* female.

MZPR322

1. Preparation of permanent mounts of mouth parts of major vector species.
2. Study of permanent slides related to vectors (Whole mounts and various structures).
3. Preparation of permanent slides of antennae, wings, legs and other. morphological structures of insects having medical importance.
4. Study of immature stages of various species of mosquitoes (eggs, larvae and pupae)
5. Collection and preservation of ticks and mites of medical and veterinary importance.

Semester – IV
MZ411

INTEGRATIVE ORGANISMAL BIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. The central role of the organism in biology.
2. Plasticity, complexity and evolution of interacting traits across levels of organization
3. The role of ecological epigenetics in integrative biology
4. The ecological and evolutionary importance of variation in life history reaction norms

SECTION –B

5. Evolutionary systems biology: shifting focus to the context-dependency of genetic effects
6. Evolutionary trade-offs and biological diversity: an integrative approach
7. Impact of climatic variations on species distributional ranges, linking physiological and evolutionary perspectives
8. Chemical ecology and biomolecular evolution

SUGGESTED READINGS

1. Martin, L.B., Ghalambor, C.K. and Woods, H.A. 2015. Integrative Organismal Biology. Wiley-Blackwell
2. Glenn-Peter Sætre and Mark Ravinet 2019. Evolutionary Genetics, Concepts, Analysis, and Practice. Oxford University Press
3. Andrew P. Hendry 2017 Eco-evolutionary Dynamics. Princeton University Press

Semester – IV
MZ412

WILD LIFE AND ITS MANAGEMENT

Maximum Marks: 60

Theory: 44

Internal Assessment: 16

Minimum Pass Marks: 35%

Total Teaching Hrs: 30

Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Introduction to wild life.
2. Wild life management Principles:
Food
Cover
Predators
Diseases.
3. Important wild animals of India (mammals and birds)
4. Factors important in wild life management:
Water
Soil
Exotic animals

SECTION-B

5. Wild life protection Act:
Hunting of wild animals.
Sanctuaries and National parks
Central Zoo Authority
Trade in wild animals
6. Conservation biology
Conflict between man and wild life.
Wild life conservation projects of India
Modern practices in wild life conservation.

SUGGESTED READINGS

1. Teage R.D., 1967: A manual of wild life conservation. Natraj Publishers, Dehradun
2. Giles R.H., 1980: Wild life management techniques. Wildlife Society, Washington.
3. Dasmann, R.F., 1982: wildlife Biology, Wiley Easton Publishers.

Semester – IV
MZ413
Zoogeography and Evolution

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

- 1 Zoogeography:
 - 1.1 Zoogeographical realms
 - 1.2 Origin of major group of animals
 - 1.3 Principles, types and theories of distribution of animals
- 2 Island theory and conservation:
 - 2.1 Habitats as Islands
 - 2.2 Island biogeography theory
 - 2.3 Speciation and Island conditions

SECTION-B

- 3 Population and Environment:
 - 3.1 Complexity of interactions between population and environment
 - 3.2 Reaction of organism to environmental complexity
 - 3.3 Sub-specific and trans-specific aspects of evolution
- 4 Origin of variation:
 - 4.1 Rates of mutations and rates of evolution
 - 4.2 Evolution of genome
 - 4.3 Diversification of natural selection

SUGGESTED READINGS

1. Whittaker, R.J.1998. Island Biogeography: Ecology, Evolution and conservation Oxford University Press, New York.
2. Seevers, Charles Systematics, Evolution and Zoogeography Chicago Natural History Museum, Chicago.
3. MacArthur, Robert H. and Wilson, Edward O.1967 The theory of Island Biogeography Princeton University Press, Princeton & Oxford.

Semester – IV
MZ414
LIMNOLOGY
Elective Paper-II

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Classification and nature of fresh water ecosystems:
Standing water – lakes, ponds, wetlands.
Flowing waters- rivers, streams and riparian habitats.
2. Characteristics of fresh water ecosystems:
Physical characteristics – current, suspended solid, light, temperature, run-off.
Chemical characteristics – dissolved gases and dissolved solids.
3. Ecological classification of fresh water organisms:
3.1 Zonation of lentic habitat
3.2 Zonation of lotic habitat.
4. Biological communities of Fresh water:
4.1 Biota of lentic habitat
4.2 Biota of lotic habitat
4.3 Adaptations to lentic and lotic habitats.

SECTION – B

5. Community structure:
Trophic structure
Food chains and food webs.
6. Animal communities and biotic interactions:
Population dynamics

Competition and predation in freshwater communities.
Movement, migration and colonization.

7. Eutrophication of water:
Eutrophic ecosystems
Characteristics and restoration of eutrophic ecosystems
8. Pollution of water:
Types of water pollutants
Effects of pollutants
Pollution indicators.

SUGGESTED READINGS

1. Fundamentals of Environmental Biology By S. Arora. Kalyani Publishers, New Delhi
2. Biology of Fresh Water by P.S. Maitland Chapman and Hall, New York
3. Handbook of Limnology and Water Pollution by S.M. Das. South Asian Publisher New Delhi
4. Fresh Water Ecology: Principles & Application by M. Jafferries Q. D. Mills CBS Publishers, New Delhi.

Semester – IV
MZ415
BIOTECHNOLOGY AND ENVIRONMENT
Elective Paper-II

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

INTRODUCTION & POLLUTION CONTROL

- 1.1 Definition, Historical background, scope & importance of biotechnology.
- 1.2 Biosorption - use of bacteria, fungi and algae in biosorption.
- 1.3 Biodegradation of Pesticides

RECYCLING AND RECLAMATION

- 2.1 Conventional waste water treatment strategies using biosystem. Activated sludge process, Trickling filter, Rotating Biological contactor (RBC) and Fluidized Beds.
- 2.2 Role of Biotechnology in:
 - 2.2.1. Energy production from Biomass

SECTION-B

BIOTECHNOLOGY AND LAND RESTORATION

- 3.1 Biotechnology for restoration of degraded land
 - 3.1.1. Reforestation through micropropagation.
 - 3.1.2. Use of microbes in improving soil fertility.
- 3.2 Use of microbes as biofungicide and bioherbicides.

NOVEL METHODS FOR POLLUTION CONTROL

- 4.1 Biotechniques for Air pollution Abatement & odour control Bioscrubbers, Biobeds, Biotrickling filters
- 4.2 Vermitechnology
- 4.3 Biodegradable plastics - Bioplastics

SUGGESTED READINGS

MZE416

INSECT PEST CONTROL AND TOXICOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Basic Principles of insect pest control:
 - Quarantine
 - Mechanical control
 - Physical methods of control.
 - Synthetic organic insecticides (Organochlorines)
 - Natural organic insecticides
 - Inorganic insecticides
2. Biological control:
 - Procedures
 - Parasites.
 - Predators
 - Micro organisms
3. Introduction to IPM.

SECTION-B

4. Appliances for insecticide application
5. Resistance to Insecticides
6. Introduction to transgenic crops.
7. Scope of toxicology:
 - Mode of action of various insecticides
 - Brief idea about antidotes
 - Route and sites of toxicity

SUGGESTED READINGS

1. Matsumura, F, 1967: Toxicology of Insecticides, Plenum Press, New York & London.
2. Kilgore, W.W. & Doult., R.L.: Pest Control, Academic Press, London & New Yourk.

Semester – IV
MZE417
AGRICULTURAL AND MEDICAL ENTOMOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Insect pests: emergence of pests and pest resurgence.
2. Life history, mode of damage and control of insect pests of cotton, wheat, sugarcane, rice, pulses, oil seeds, vegetables.
3. Stored grain pests, their biology and control.
4. Biology and control of locust.
5. Household pests.

SECTION-B

6. Arthropods as vectors of human diseases.
7. Systematics, biology and control of major insect vectors belonging to Diptera.
8. Mode of transmission, control of vectors and epidemiology of Malaria, Filariasis, Dengue and Plague.

SUGGESTED READINGS

12. Roy, D.N. : Entomology (Medical and Veterinary) Calcutta, India.

Semester – IV
MZC418
HUMAN AND MEDICAL GENETICS

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Organization of human genome:
 - 1.1 Techniques in human chromosome analysis
 - 1.2 Human karyotype and nomenclature
 - 1.2.1. Morphological characteristics of human somatic chromosomes
 - 1.2.2 Morphological variability of human chromosomes: satellite variability, acrocentric chromosomes and secondary constriction
2. Sex determination and sex linked diseases:
 - 2.1 X chromosomes and X linked diseases
 - 2.2 Y chromosomes and Y linked diseases
 - 2.3 Dosage compensation.
3. Longitudinal differentiation of chromosomes:
 - 3.1 C,G, Q and R banding
 - 3.2 Chromosome painting
4. Chromosome mapping:
 - 4.1 Somatic cell hybridization and in situ hybridization
 - 4.2 Restriction maps and construction
 - 4.3 Physical map of human genome.

SECTION – B

5. Numerical abnormalities of human chromosomes:
 - 5.1 Non disjunction and aneuploidy
 - 5.2 Patau syndrome, Edward syndrome, Down syndrome, Turner syndrome and Klinefelter syndrome
 - 5.3 Mosaics and chimeras
6. Structural abnormalities of human chromosomes:
 - 6.1 Deletions and robertsonian translocations

- 6.2 Cri-du-Chat syndrome, Pader-Willi syndrome, Williams syndrome and Wolf-Hirschhorn syndrome
- 6.3 Genomic imprinting.
- 7 Genetic screening and prenatal diagnosis:
 - 7.1 Prenatal, neonatal and adult screening
 - 7.2 Pedigree analysis and genetic counselling
 - 7.3 Pre-implantation diagnosis and genetic imprinting
 - 7.4 ELSI.
- 8 Gene therapy:
 - 8.1 Criteria for effective gene therapy
 - 8.2 Therapy of recessive and dominant disorders
 - 8.3 Current gene therapy and its future.

SUGGESTED READINGS

Semester – IV
MZC419
Cell Division, Differentiation and Cellular Interaction

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION-A

1. Cell division in eukaryotes:
 - Cell cycle
 - Measurement of cell cycle period
 - Spindle organization
 - Chromosome movements
 - Synchronization of cell division
 - Regulation of cell division

2. Differentiation:
 - Genetic determinants of development
 - Genetic Control of cell lineages
 - Genetic basis of pattern formation
 - Homeo-box, significance in differentiation.
 - Cellular senescence

SECTION-B

3. Cancer :
 - Macroscopic and Microscopic features of tumors
 - Mechanism of invasion and metastasis
 - Etiology and pathogenesis of neoplasia

4. Molecular Genetics of cancer:
 - Oncogenes
 - Tumor suppressor genes
 - Mutator genes
 - Tumor markers

5. Cell and environment
 - Effects of radiations on cells
 - Effects of chemicals on cells
 - Mutagens
 - Drugs
 - Apoptosis- mechanism and Significance

SUGGESTED READINGS

1. Alberts, Bray, Lewis, Raff, Roberts and Watson, 1983: Molecular Biology of cells, Garland Pub. Inc., New York.
2. Zubay, 1987: Genetics. The Benjamin/cumming Publishing Company
3. Watson, Hopkin, Roberts, Steitz, Weiner, 1987: Molecular Biology of Gene. Benzamin Cumming, Pub. Co.

Semester – IV
MZP420

CELL PHYSIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Applications of the laws of thermodynamics to the cell :
 - 1.1 The First law of thermodynamics : The law of conservation of energy
 - 1.2 Entropy and second law of thermodynamics
 - 1.3 The Law of conservation of matter and life
 - 1.4 Cellular enzymes:
 - 1.4.1 Hydrolytic enzymes.
 - 1.4.2 Enzymes involved in cellular oxidation – reduction.
 - 1.5 Release of energy in cells:
 - 1.5.1 Pathway of oxidation reduction reactions of the cell
 - 1.5.2 Determination of redox potentials in living cells.
- 2.1 Heat and cold resistance of active cells.
- 2.2 Thermal resistance of dormant cells
- 2.3 Cellular and molecular effects of ultra violet radiations and the phenomenon of photoreactivation.
- 2.4 Cellular and molecular effects of ionizing radiation and mechanism of radio protection.
- 2.5 Bioluminescence:
 - 2.5.1 Fluorescence and phosphorescence
 - 2.5.2 Chemical basis of bioluminescence in fire fly and luminous bacteria
 - 2.5.3 The physical nature of bioluminescence

SECTION – B

3. The functional significance of cell membranes:
 - 3.1 The chemical composition of cell membrane.
 - 3.2 The models of membranous structure
 - 3.3 Cell to cell contact and communications.
 - 3.4 Biological transport processes:
 - 3.4.1 Osmotic flow
 - 3.4.2 Facilitated diffusion
 - 3.4.3 Active transport
 - 3.4.4 Bulk transport (endocytosis, phagocytosis, pinocytosis, exocytosis etc.)

- 3.5 Membrane bioelectrics:
 - 3.5.1 Action potentials in excitable plant cells
 - 3.5.2 Sensory fiber action potentials
 - 3.5.3 Synaptic transmission of action potentials.
- 4. The biochemistry of contraction with special reference to the physiology of skeletal muscle fiber :
 - 4.1 Ultra structure and the structural proteins of muscle cells
 - 4.2 The sliding filament theory of muscle contraction and the source of energy for contraction.
 - 4.3 Excitation of muscle contraction and the mechanism of coupling between the electrical and chemical events.
 - 4.4 Work and heat relations in muscle contraction.
 - 4.5 Physiological types of muscles (skeletal, cardiac and smooth) and their functional specialization.
 - 4.6 Mechanism of contraction in non-muscular cells.

SUGGESTED READINGS

Semester – IV
MZP421

MAMMALIAN PHYSIOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION – A

1. Sensory Physiology
 - Characteristics of sensory receptors
 - Cutaneous sensations
 - Taste and smell
 - Vestibular apparatus and equilibrium
 - The Ears and hearing
2. Physiology of respiration.
 - Air conducting passages and respiratory surfaces.
 - Mechanism of breathing.
 - Volume and capacities of lungs.
 - Alveolar ventilation and dead space.
 - Transport of O₂ and CO₂ in the blood.
 - Chemical control of respiration.
9. Pulmonary abnormalities.
 - Emphysema
 - Pneumonia
 - Atelectasis
 - Asthma
 - Hypoxia

SECTION –B

10. Physiology of excretion
 - The functional anatomy of mammalian kidney and its renal unit.
 - The role of ultra filtration, re-absorption and secretion as transport mechanisms involved in the formation of urine.
 - Control of urinary concentration of sugar, urea, sodium, potassium and PH.
 - Functions of aldosterone. Antidiuretic hormone and rennin angiotensin system in renal physiology.
 - Regulation of acid-base balance.
11. Physiological Regulatory Networks:
 - Physiological Regulatory Network (PRN)

Known and expected characteristics of PRNs
Organismal Implications of PRNs: Stability and Resiliency
Ecological and Evolutionary Implications of PRNs: Constraints and
Evolvability

IMMUNOLOGY

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION –A

1. The complement system : Functions of complement components of complement system, activation and regulation of the complement system, complement deficiencies
2. Major Histocompatibility Complex: General organization and inheritance of MHC, Regulation of MHC expression, MHC and immune responsiveness, MHC and disease susceptibility.
3. Immune response to infectious diseases, viral infections, bacterial infections, protozoan diseases and diseases caused by parasitic worms (Helminths).
4. Auto immunity: Organ specific autoimmune diseases, systemic autoimmune diseases, mechanisms for induction of autoimmunity.

SECTION –B

5. Hypersensitive reactions: Classification IgE mediated (Type-I) hypersensitivity, antibody –mediated cytotoxic (Type-II) hypersensitivity, Immune complex mediated (Type-III) hypersensitivity, TDTH mediated (Type –IV) hypersensitivity.
5. Vaccines: active and passive immunization, whole organism vaccines, Purified macromolecules as vaccines, recombinant vaccines, DNA vaccines, synthetic peptide vaccines, multivalent subunit vaccines.
7. Cancer and immune system: origin, malignant transformation of cells, oncogenes and cancer induction, tumors of the immune system, tumorevasion of the immune system, cancer immunotherapy.
8. AID's and other immunodeficiencies.

SUGGESTED READINGS

HOST-PARASITE RELATIONSHIPS

Maximum Marks: 60
Theory: 44
Internal Assessment: 16
Minimum Pass Marks: 35%

Total Teaching Hrs: 30
Time Allowed: 3 hrs

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6½ marks each. Section C will consist of 9 short-answer type questions will cover the entire syllabus uniformly and each will carry 2 marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions from each section A & B of the question paper and the entire section C.

SECTION –A

1. Establishment of infection:
Active and passive entry, site selection within the host, entry into specific organs and cells.
2. Host-parasite interface:
In extracellular and intracellular parasites.
3. Parasite induced modifications of the host:
Effect on behaviour, growth, parasitic castration.
4. Modifications of the host cell by
Microsporidians, Piroplasms & *Plasmodium*.
5. Uptake of Nutrients:
5.1 Role of external surface, tegument and alimentary canal of parasites.
5.2 Digestion.
6. Metabolism:
Energy sources and respiration with special reference to *Entamoeba*, *Giardia*, *Trypanosoma*, Trichomonads and helminths including *Ascaris*.

SECTION –B

7. Immunoparasitology:
7.1 Immune reactions to Trypanosomes, malaria, leishmaniasis, American trypanosomiasis and schistosomiasis.
7.2 Acquired immunity to intestinal nematodes.
8. Main clinical and pathological signs of parasitic infections in domestic animals:
Parasitic diseases of the alimentary system, oral cavity and oesophagus, gastrointestinal tract; liver and abdominal cavity.
Parasitic diseases of the respiratory system : nasal cavity and sinuses, larynx, trachea and lower respiratory tract.
Parasitic diseases of the urinogenital system.
Parasitic diseases of the nervous system.
Parasitic diseases of the cardiovascular and hematopoietic system.

MZ424

Semester IV

Practical Paper VII: Pertaining to theory papers MZ411, MZ412, MZ413, MZ414 & MZ415

MZ411

1. Knowledge about cuticular hydrocarbons and their extraction.
2. Study about Mutualism: Effects of Ants on Aphids, Their Predators, and Host Plants.
3. Linking of phenotypic plasticity with adaptation in insect societies.
4. Avoidance of predator odors, a case study with squirrels.
5. Report on invasive ant species and their life history traits

MZ412

1. To deliver a seminar on a topic related to wild life conservation.
2. To submit an assignment on a topic concerning wild life in India.
3. To prepare a report on the latest events concerning wild animals at the national and international level.
4. To observe the behavior of one wild animal and to write a report on it.
5. To visit a wild life National Park and to submit a report on it.

MZ413

1. To study the habitat, distribution, habits and important characters of various animals: *Naja naja*, Pigeon, *Hystrix* (Porcupine), *Hyla*, *Salamander*, *Apteryx* (kiwi), Flying Squirrel, *Ornithorhynchus*, *Protopterus*, *Peripatus*, *Balanoglossus*, *Archaeopteryx*.
2. To study the vestigial organs in animals.
3. To study the zoogeographic realms of the world.
4. Map studies:
 - a. India – Climatic Regions
 - b. India Rainfall and wind
 - c. India – Distributions of Animals
 - d. Distribution of endangered animal species in Himalayan region
5. Map studies: Biodiversity Hotspots location in (a) World (b) India
6. Map Studies: Protected Areas of India such as National parks, Wildlife Sanctuaries, Biosphere Reserves.
7. To study the Leg modifications in case of insects.

MZ414

1. To estimate the CO₂ concentration in given water sample.
2. To estimate the concentration of Dissolved Oxygen in given water sample.
3. To estimate the total alkalinity of given water sample.
4. To estimate chloride in given water sample.
5. To estimate total hardness in given water sample.
6. Analysis of phytoplankton and zooplankton in given water sample.

MZ415

1. Study of the Microbial Techniques
2. Study of growth response of bacteria on petroleum fuel (diesel)
3. Isolation and Characterization of Bacteria from Crude petroleum oil contaminated soil.

4. Interaction of Plant seeds with diesel for potential use in the remediation of diesel fuel contaminated soils.
5. Detection of alkylbenzenesulfonate – degrading microorganisms
6. Field Trip: Waste water treatment plant, distilleries etc.
7. Enrichment for Uric Acid utilizing bacteria
8. To produce Biodiesels in the lab.
9. Solar energy : production and uses
10. Vermicomposting: to culture earthworm in soil.

MZ425

Specialization Entomology

Practical Paper VIII: Pertaining to theory papers of specialization MZE416 & MZE417

MZE416

1. To study different kinds of hand operated sprayers: Syringe, Bucket Pump Sprayer, Knap Sack Sprayer, Rocket Sprayer, Foot of Paddle Pump Sprayer, Wheel Barrow Sprayer and Hand Atomizer (Flit Pump)
2. To study spray lances and cut off devices.
3. To study the effect of concentration of insecticides on given Insect.
4. To make a comparative study and determine the strongest fumigant.
5. To study the testing of attractancy of a substance on Insects.

MZE417

1. Study of major crop pests: their identification and writing a note on their economic importance.
2. Study of the biology of some stored grain pests by rearing them in the laboratory.
3. Identification of major insect vectors and writing note on their medical importance
4. Study of permanent slides of vectors.
5. Preparation of permanent mounts of mouth parts of major vector species.
6. Preparation of permanent slides of antennae, wings, legs and other morphological structures of insects having medical importance.

Specialization Cytogenetics

Practical Paper IV: Pertaining to theory of specialization MZC418 & MZC419

MZC418

1. To study the distribution of constitutive heterochromatin in the somatic metaphase plates of Rat bone marrow.
2. To study the distribution of constitutive heterochromatin in somatic metaphase plates of *Hemidactylus* bone marrow.
3. To study the distribution of constitutive heterochromatin in the different stages of meiosis of Rat testes.
4. To study nucleolar Organizer regions (NOR) in the somatic metaphase plates of Rat bone marrow.
5. To study Nucleolar Organizer regions (NOR) in the somatic metaphase plates of *Hemidactylus* bone marrow.
6. Study of normal human chromosome complement and karyotyping
7. Study of chromosome abnormalities in complements of human syndromes and their karyotyping.

MZC419

1. Histochemical preparation of slides to demonstrate localization of glycogen in the given tissue.
2. Histochemical preparation of slides to demonstrate localization of lipids in the given tissue.
3. Histochemical preparation of slides to demonstrate localization of proteins in the given tissue.
4. Histochemical preparation of slides to demonstrate localization of nucleic acids in the given tissue.
5. Demonstration of laminar air flow and its applications.
6. Demonstration of instruments used in extraction and amplification of DNA and their applications.

Specialization Physiology

Practical Paper VIII: Pertaining to theory of specialization MZP420 & MZP421 MZP420

1. To demonstrate osmotic haemolysis in RBC's.
2. To demonstrate the activity of amylase.
3. To demonstrate the activity of enzyme catalase.
4. To demonstrate the dehydrogenase activity in milk.
5. To demonstrate the absorption chromatography for the separation of leaf pigments using a piece of chalk.
6. Demonstration of absorption curves of KMnO_4 .
7. Spectrophotometric demonstration of Beer Lambert's Law.

MZP421

1. To plot the calibration curve for standard solution of glycogen.
2. To determine the amount of ascorbic acid in the given sample.
3. Extraction and quantitative analysis of glycogen in liver.
4. To plot the calibration curve for standard solution of proteins.
5. Demonstration of thin layer chromatography of neutral lipids.
6. Determination of total leukocyte count of given sample of blood.
7. Enumeration of red blood corpuscles in the given sample of blood.

Specialization Parasitology

Practical Paper IV: Pertaining to theory papers of specialization MZPR422 & MZPR423

MZPR422

1. Preparation of Immunoglobulin IgG from Sheep/goat serum.
2. Immuno-precipitation of immunoglobulin from sheep/goat serum.
3. To demonstrate the process of Hemagglutination assay.
4. To study the techniques of immunohistochemistry.
5. To demonstrate ELISA (Enzyme linked Immunoabsorbent Assay) technique.
6. To separate lymphocytes from peripheral blood.
7. To prepare cell suspension from lymphoid organ.

MZPR423

1. Enumeration of eggs/oocysts/larvae of gastrointestinal protozoan and helminth parasites of sheep and goat by Salt Floatation method, Zinc Sulphate method and Formaldehyde Ether Sedimentation method.
2. Prepare and stain (H + E) histological sections of nematode (*Trichuris*) and cestode (*Moniezia*) parasites to demonstrate the host-parasite interface.
3. Study of detailed morphology and classification of nematode, cestode and trematode parasites of sheep and goat : *Trichuris globulosa*, *Trichuris ovis*, *Haemonchus contortus*, *Oesophagostomum* sp., *Moniezia* sp., *Stilesia* sp., *Avitellina* sp., *Paramphistomum* sp. and *Cotylophoron* sp.
4. Study of histopathology of large intestine caused by the nodular worm. *Oesophagostomum columbianum*.

OPEN ELECTIVE SUBJECT ECONOMIC ZOOLOGY

Maximum Marks: 50
Theory: 38
Internal Assessment: 12

Total Teaching Hrs: 30
Time Allowed: 3 hrs
Minimum Pass Marks: 35%

INSTRUCTIONS FOR THE PAPER-SETTER

The question paper will consist of three sections: A, B & C. Section A & B will have four questions in each section from the respective sections of the syllabus and will carry 6 marks each. Section C will consist of 7 short-answer type questions that will cover the entire syllabus uniformly and each will carry two marks.

INSTRUCTIONS FOR THE CANDIDATES

Candidates are required to attempt two questions each from the section A & B of the question paper and the entire section C.

SECTION – A

1. Aquaculture : definition, objectives, its role in impending food crisis
2. Poultry farming: table and egg-laying varieties of chicken, economic importance of poultry products.
3. Dairy farming: milk production, status of dairy industry in India, importance of milk and other dairy products.
